Books and Films

The Family History Center has a variety of books, both in hard copy and on microfiche. Most of the books are about genealogical research procedures or advice to find and use sources of genealogical data. Some of the books do contain explicit genealogical information such as the names of early immigrants to American Colonies, or marriages.

The indefinite film collection at the Family History Center includes a variety of microfilm and microfiche that cannot be concisely described. This collection includes the 1790 census of the United States, the Wisconsin Marriage Index, Norwegian Farm Names, Boyd's Marriage Index and many other titles.
